

Videoconferencing

Embedded caption options

The platforms/apps in the table below all have embedded captions into their program/app which means the user can view a lesson led by a teacher or participate in a group meeting while watching the captions in the same window.

Non-embedded caption options

ANY platform can use the services of a live captioner via a 3rd party captioning service. Captions are then displayed in a separate browser window. Individuals can either resize the captioning window compared to the videoconferencing window or they can view the captions on a separate device or monitor.

- StreamText (<http://StreamText.net>)
- 1CapApp (<http://1CapApp.com>)
